PRODUCER

ABOUT US

As “Aslan Plastic” it was established so as to supply raw material for Textile and Package Fabrics in 2003.

In 2013 it has diverted its serving area with manufacturing single use products, by extruders and injection machines since 2013.

Our company is center of production in injection and package sector, with aspect of international standards, rapidly growing and increasing competition area, using high quality of raw material, machines and qualified staff. For a quality work; we increase our production volume and production range with aspect of R&D, investment and high technology, we submit to our customers all of our innovations.

We perform all these work with highest technology and with best hygienic conditions. Our production area was 650 meters square in 2003 and now it has reached 15000 meters square.

The monthly capacity of our business, which produces many different types of cups, pallet stretch, food stretch, bowls and plates, as well as fork, spoon, knife, tea and coffee mix sets, continues to grow, reaching 1000 tons.

In accordance with ISO 9001-2008 quality standards, and having been in 4th position among the companies, manufacturing single use kitchenware and tableware products in Southeast, East and Mediterranean region of Turkey; our company is going on for its investing.

It will receive BRC food security certificate soon as well.

HAKKIMIZDA

2003 yılında Gaziantep’de plastik sektöründe ASLAN PLASTİK OLARAK tekstil ve ambalaj fabrikalarına sarf malzeme, yedek parça üretimine enjeksiyon alanında faaliyet göstermek üzere kurulmuştur.

2013 yılında extruder ve enjeksiyon yöntemiyle tek kullanımlık ürünler üretmeye başlayarak faaliyet alanını değiştirmiştir. Plastik enjeksiyon ve ambalaj sektöründeki uluslararası standartları yakalayan firmamız hızlı gelişmeyi ve artan rekabet ortamını göz önünde bulundurarak, kaliteli hammadde modern makine ekipman parkı ve kalifiye çalışanları ile bir üretim merkezi haline gelmiştir.

Üretim hacmimizi ve ürün yelpazemizi kaliteli üretim için; arge, yatırım, ileri teknolojiye ve insana olan yatırımlarımız ile günden güne artırmakta ve tüm yeniliklerimizi müşterilerimize hızla sunmaya gayret etmekteyiz. Her iki alanda da üretim, günümüz piyasasındaki en ileri teknoloji ve hijyenik koşullar ile gerçekleştirilmektedir.

Üretim alanımız 2003 yılında sadece 650 METERkare iken şimdi 15000 METERkareye ulaşmıştır.

Çatal, kaşık, bıçak, karıştırıcı setlerinin yanı sıra farklı türde birçok bardak, palet strech, gıda strech, kase ve tabak çeşitleri üreten işletmemizin aylık kapasitesi 1000 tona ulaşarak büyümeye devam etmektedir.

ISO 9001-2008 Kalite Standartlarına uygun şekilde üretim yapan ve 2013 yılında Güneydoğu, Doğu, Akdeniz de ilk Tek Kullanımlık Plastik (kullan at) üreten şirketler sıralamasına göre Türkiye’de 4. sırada yer alan kuruluşumuz atılımlarına devam etmektedir.

Belgeler arasına yakın zamanda BRC Global Gıda Standardını da ekleyecektir.

DOĞA DOSTU AMBALAJLAR

Son dönemde tek kullanımlık plastik kullanımına karşı oluşan farkındalık ile birlikte plastik kullanımını sınırlandırmak üzere bir çok ülkede farklı uygulamalar yürürlüğe girmeye başladı. Buna paralel olarak GREENLİFE bioplastik şirketinin ahşap lifleri ile geliştirmiş olduğu alternatif bir çözüm olan wpi adlı ürününü kullanmaya başladık.

Bambu görünümlü ürünler, kalite olarak plastik ürünlerden daha sağlam ve doğal olmakla beraber performansından ödün vermez. Yurtiçinde olan makina parkurumuz ve yerli hammaddenin desteği ile üretilen ürünlerde, ithalat sıkıntısı yaşanmamaktadır.

Sağlıklı ve kullanışlı yapısı ile sunumlarda bambu çatal, bıçak, kaşıklar artık daha çok tercih sebebidir. Günümüzde tek kullanımlık ürünlerin kullanımının artışı ile plastik hammadde yerine doğa dostu ahşap ürünler üretiyoruz.

WPI Nedir? (ahşap lifi compast)

Geleneksel plastik, fosil yakıtlardan yapılan petrol türevi bir üründür.

WPI, kısmen ahşap liflerinin bir araya gelmesiyle oluşan malzemedir. Temel olarak plastik gibi görünen ve hissedilen, ancak petrol yerine ahşap lifleri ile yapılan, bu nedenle de çevreci, sonu olmayan bir kaynaktır.

“Doğallıktan Yanayız”

NATURE FRIENDLY PACKAGING

Recently, with the awareness against the use of single-use plastics, different practices have started to come into force in many countries to limit the use of plastics. In parallel with this, we started to use wpi, an alternative solution developed by GREENLIFE bioplastics company with wood fibers.

Bamboo-like products are more robust and natural than plastic products in terms of quality and do not compromise on performance. There is no import problem in the products produced with the support of our domestic machine park and domestic raw materials.

With its healthy and useful structure, bamboo forks, knives and spoons are now more preferred in presentations. Today, with the increasing use of disposable products, we produce environmentally, friendly wooden products instead of plastic raw materials.

What is WPI (wood fiber compast)?

Conventional plastic is a petroleum-derived product made from fossil fuels.

WPI is a material that is partly composed of wood fibers. It basically looks and feels like plastic, but is made with wood fibers instead of petroleum, and is therefore an environmentally friendly, endless resource.
